

USER GUIDE

# Get the most out of Vance Health Hub

Your credible source for evidence-based research and clinically-grounded tools — and the private dashboard that keeps your data, notes and AI conversations in one place, at every step of your healthcare journey.

[vancehealthhub.co.uk/user-guide](https://vancehealthhub.co.uk/user-guide)

## Built on Evidence, Organised Around Your Healthcare Journey

Vance Health Hub exists to put clinically-reviewed information and clinically-grounded tools in your hands — not vague advice from an anonymous forum. Articles are clinically reviewed, the calculators are built on validated frameworks (MUST, IBD-NST, GLIM), and every VANCE-Ai answer comes with its sources attached. This guide follows the same four steps most people move through:

**1**

### Research

Use the Discovery Suite to find clinically-reviewed articles and recipes filtered to your exact condition and topic.

**2**

### Personalise

Complete your Health Profile once during onboarding, and the whole site adjusts to you.

**3**

### Ask

Get a sourced, plain-language answer from VANCE-Ai the moment a question comes up.

**4**

### Track & Share

Save every tool result and note to My Dashboard, and bring the record to your next appointment.

## STEP 1

# Getting Started in Under 2 Minutes

- 1 **Create your free account.** Click “Join For Free” from the homepage or the footer — no payment details, ever.
- 2 **Land straight in My Dashboard.** Confirming your account takes you directly to your personal dashboard, not a generic welcome screen.
- 3 **Complete your Health Profile.** A few quick questions personalise the articles, tools and recommendations you see across the whole site.

From that point on, Vance Health Hub isn't a generic health website — it's tuned to your condition, so the research, tools and AI answers you see are actually relevant to your own healthcare journey.

## FIND WHAT MATTERS TO YOU

# The Content Discovery Suite

Instead of scrolling an endless archive, the Discovery Suite on the homepage lets you filter every article, recipe and resource by condition, topic and content type at once. Results update as you filter, and any search you like can be saved to **My Searches** in your dashboard for one-click access next time.

Because every result comes from clinically-reviewed content rather than the open web, you can trust what you find enough to actually bring it to your next appointment — that's the difference between researching your condition and just searching for it.

## YOUR AI HEALTH ASSISTANT

# Ask VANCE-Ai Anything

The VANCE-Ai button lives in the header on every page — open it any time to ask a question in plain language. On articles, you can also highlight any passage of text and ask VANCE-Ai about it directly. Every conversation is saved automatically to **My VANCE-Ai** in your dashboard, so nothing gets lost.

Because every answer is sourced rather than invented, you can check where it came from yourself, or bring the saved conversation straight to your clinician instead of trying to remember what an AI told you weeks ago.

## OPEN ACCESS

# Free Health Tools, No Signup Required

Every clinical tool is free to use on the spot. Register only if you want your results saved automatically to your dashboard. Each one is built on a validated clinical scoring framework, so you get a real number to act on instead of a guess — and because every result is saved with a date, running the same tool again later shows you a trend, not just a snapshot.

# My Dashboard Ties Everything Together

Every tool result, saved article, AI conversation and note in one private place. It's where onboarding leads, and where you'll spend most of your time — the difference between researching your condition once and actually managing it over time.

-  **Never re-explain your history.**  
Your Health Profile, notes and saved results are there every time you log in — no starting from zero with a new clinician or a new appointment.
-  **See real patterns, not memories.**  
Run the same calculator or quiz again after a flare-up or a diet change and compare it against your last result.
-  **Walk into appointments prepared.**  
Open My Dashboard on your phone in the waiting room and show your clinician actual numbers, saved articles and notes.
